Answer sheet with explanations

Q	Answer	How to get it
1	E	The figure turns 45 degrees anticlockwise each time.
2	C	The dots go up by one each time while the shading repeats its pattern.
3	D	The shape gains one side each time, so a 9 sided shape comes next.
4	B	The shaded half turns 90 degrees anticlockwise each time.
5	A	Four shapes are black. The odd one is grey.
6	B	Four figures are the same shape simply turned round. The odd one is a mirror image, so no amount of turning can match it.
7	E	Four figures have 5 dots under the shape. The odd one has 4.
8	C	Four shapes are small. The odd one is much larger.
9	A	Across each row the shape stays the same but turns black.
10	D	Across each row the shape stays the same but gets bigger.
11	E	Across each row the figure turns 90 degrees clockwise.
12	B	Across each row the shape keeps its dots and gains one more.
13	C	Only one option is the figure simply rotated. The others are mirror images, which can never match however far you turn them.
14	A	Only one option is the figure simply rotated. The others are mirror images, which can never match however far you turn them.
15	D	Only one option is the figure simply rotated. The others are mirror images, which can never match however far you turn them.
16	B	Only one option is the figure simply rotated. The others are mirror images, which can never match however far you turn them.
